

What I like most about the program is broadening and reflecting my knowledge and discussing with professors, lecturers and within the group!

It helps a lot to grow professionally and personally.

Christoph Abendroth,  
Bayer Business Services GmbH

There comes a point in the career where you look to challenge yourself in order to expand your abilities and skillset for the future. After more than 15 years of work experience at the interface of business and IT, this program came right in time for me.

The highly ranked TU Munich and University of St. Gallen offer a curriculum which blends state-of-the-art management and IT content that leaders need who want to prepare for future challenges.

It is a great learning experience to be in a class of executives from different industries, sharing perspectives and discussing how concepts can be applied to tackle business issues.

Thorsten Camin,  
Henkel AG & Co. KGaA

I chose this EMBA program because its modular structure that worked well with my professional and personal schedule.

What I like most about the program is the special focus on IT-related cases that help me to better understand the link between business and IT.

The program already helped me to perform new challenging roles and contribute towards excellence in leveraging IT for business.

Luís Faria,  
Schindler Informatik AG

I have chosen this program because of the strong practical relevance and the integration of practitioner talks. Not only the theoretical background is strengthened during this great program. But also and even more, the application in the real world and how all comes together when listening to the high profile speakers, many of them CIOs or CEOs of large corporations, becomes very clear.

David Preuss,  
TÜV Rheinland Service GmbH

I chose this EMBA program because it fits exactly my field of interests and supports my personal development in a divers and energetic group environment!

What I like most about the program is the variety between theory and practical knowledge.

Specifically the high-level guests holding practitioner talks and the possibility to exchange with Executive peers.

I can say that the program already helped me to strengthen my strategic thinking and to extend my network to excellent and motivated peers!

Martin Wibbe,  
Atos International GmbH

I choose the EMBA program in Business and IT as I wanted to get a 360 degree view on business-administration aspects on C-level.

Combined with the academic background of well-known experts allows us to discuss and review strategic decisions and to find the right balance between demand and supply.

Especially the practitioner talks of current and former C-levels are giving me the chance to get deep insights together with the person behind the role.

Sascha Wirtz,  
Henkel AG & Co. KGaA
